

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (Original) An organopolysiloxane polymer having a glycerol derivative which can swell up by containing at least its own weight of a liquid oil.
2. (Original) The organopolysiloxane polymer according to Claim 1, obtained by the addition polymerization of the organohydrogen polysiloxane expressed by the following general formula (a1) and/or following general formula (a2), with one or more compounds selected from a group comprising the glycerol derivative having an alkenyl group expressed by the following general formula (b1), the organopolysiloxane having an alkenyl group expressed by the following general formula (b2), and the hydrocarbon having an alkenyl group expressed by the following general formula (b3), wherein the ingredients expressed by the aforesaid general formula (a1) or (b1) are essential ingredients.

wherein,  $R^1$  in the formulae may be identical or different,  $R^1$  is a substituted or unsubstituted monovalent hydrocarbon group having 1-30 carbon atoms which does not contain an alkenyl group,  $R^2$  is a monovalent group having a glycerol derivative  $G$ ,  $R^3$  is an alkenyl group having 2-20 carbon atoms,

a, b, c, d, e, p and q are respectively defined by :

$1.0 \leq a \leq 2.3$ ,  $0.001 \leq b \leq 1.0$ ,  $0.001 \leq c \leq 1.0$ ,  $1.0 \leq d \leq 2.3$ ,  $0.001 \leq e \leq 1.0$ ,  $1.0 \leq p \leq 2.3$ ,  $0.001 \leq q \leq 1.0$ , and  
 $1.5 \leq a+b+c \leq 2.6$ ,  $1.5 \leq d+e \leq 2.6$ ,  $1.5 \leq p+q \leq 2.6$ , f is an integer from 2-10, and r is an integer from 0-20.

3. (Original) The organopolysiloxane polymer according to Claim 2, wherein R<sup>2</sup> in the formula (a1) is represented by the following general formula, x is an integer from 2-20 and s is an integer from 1-20:

4. (Currently Amended) The organopolysiloxane polymer according to Claim 2 or 3, wherein (b1) is expressed by the following general formula, and s is an integer from 1-20:

5. (Original) The organopolysiloxane polymer according to Claim 2 having said organohydrogenpolysiloxane (a1) as an essential ingredient, and comprising said ingredient together with the glycerol derivative b(1) having an alkenyl group and/or the organopolysiloxane b(2) having an alkenyl group.

6. (Currently Amended) The organopolysiloxane polymer according to claim 1 any of Claims 1-4, comprising said organohydrogenpolysiloxane a(2) and glycerol derivative b(1) having an alkenyl group.

7. (Currently Amended) A pasty composition formed by containing a liquid oil in an organopolysiloxane having a glycerol derivative according to claim 1 any of Claims 1-6 so that it swells up.

8. (Original) The pasty composition according to Claim 7, wherein said liquid oil is one or more liquid oils selected from among a group comprising silicone oils, hydrocarbon oils, ester oils, natural animal and vegetable oils and semi-synthetic oils.

9. (Currently Amended) A composition formed by adding one or more acidic substances selected from a group comprising organic acids, inorganic acids and inorganic acid salts to one or more polymers selected from among a group comprising the organopolysiloxane polymer having a glycerol derivative according to claim 1 any of Claims 1-6 or pasty composition based thereon selected from Claim 7 or 8, adding a basic neutralizing agent so that the pH is 5-8, and then removing volatile ingredients by heating and/or reducing pressure.

10. (Original) The composition according to Claim 9, wherein the salt produced from said acidic substance and said basic neutralizing agent has a buffer action.

11. (Currently Amended) The composition according to Claim 9 or 10, wherein said acidic substance is one or more compounds selected from among a group comprising citric acid, lactic acid, malic acid, glutamic acid, oxalic acid, acetic acid, glycine, succinic acid and calcium dihydrogen phosphate, and said basic neutralising agent is one or more agents selected from among a group comprising sodium carbonate, sodium hydrogen carbonate, sodium hydroxide, potassium hydroxide, di-sodium hydrogen phosphate and sodium acetate.

12. (Currently Amended) The composition according to claim 9 any of Claims 9 to 11, wherein the proportion of said acidic substance and said basic neutralising agent relative to 100 weight parts of said organopolysiloxane polymer is 0.01-10 weight parts, and to obtain said composition, the volatile ingredient is removed by heating to 20-150°C after adding said acidic substance, and further heating to 20-150°C and/or reducing pressure after adding said basic neutralising agent.

13. (Currently Amended) A cosmetic material formed by blending one or more polymers selected from among a group comprising the polymers according to claim 1 any of Claims 1 to 6, or pasty composition based thereon selected from Claim 7 or 8 or composition having pH 5-8 selected from Claims 9 to 11, as ingredient A).

14. (Original) The cosmetic material according to Claim 13, further comprising an oil as ingredient B).

15. (Currently Amended) The cosmetic material according to Claim 13 or 14, further comprising water as ingredient C).

16. (Currently Amended) The cosmetic material according to ~~claim 13 any of Claims 13 to 15~~, further comprising a compound having an alcoholic hydroxyl group in the molecular structure as ingredient D).

17. (Currently Amended) The cosmetic material according to ~~claim 13 any of Claims 13 to 16~~, further comprising a water-soluble or water-swelling polymer as ingredient E).

18. (Currently Amended) The cosmetic material according to ~~claim 13 any of Claims 13 to 17~~, further comprising a powder and/or colorant as ingredient F).

19. (Original) The cosmetic material according to Claim 18, wherein at least part of the powder and/or colorant which is ingredient F) is a powder selected from a crosslinked spherical dimethyl polysiloxane fine powder having a crosslinked dimethyl polysiloxane structure, a crosslinked spherical polymethyl silsesquioxane fine powder, and a fine powder formed by coating the surface of crosslinked spherical polysiloxane rubber particles with polymethylsilsesquioxane particles.

20. (Currently Amended) The cosmetic material according to ~~claim 13 any of Claims 13 to 19~~, further comprising a surfactant as ingredient G).

21. (Original) The cosmetic material according to Claim 20, wherein the surfactant of said ingredient G) is a straight-chain or branched organopolysiloxane having a polyglycerol chain in the molecule, or an alkyl co-modified organopolysiloxane.

22. (Currently Amended) The cosmetic material according to claim 20 or 21, wherein the HLB of said ingredient G) is 2-8.

23. (Currently Amended) The cosmetic material according to claim 13 any of Claims 13-22, further containing a composition comprising a hydrophobic crosslinked organopolysiloxane polymer and a liquid oil as ingredient H).

24. (Currently Amended) The cosmetic material according to claim 13 any of Claims 13-23, further comprising a silicone resin as ingredient I).

25. (Original) The cosmetic material according to claim 24, wherein the silicone resin of ingredient I) is an acrylic silicone resin.

26. (Currently Amended) The cosmetic material according to Claim 24 or 25, wherein the silicone resin of ingredient I) is an acrylic silicone resin containing one or more organic groups selected from among pyrrolidone, long-chain alkyl, polyoxyalkylene, fluoroalkyl and anionic carboxylic groups in the molecule.

27. (Original) The cosmetic material according to Claim 24, wherein said ingredient I) is one or more types of silicone resin selected from among a group comprising silicone resins formed from  $R^1_3SiO_{0.5}$  units and  $SiO_2$  units, silicone resins formed from  $R^1_3SiO_{0.5}$  units,  $R^1_2SiO$  units and  $SiO_2$  units, silicone resins formed from  $R^1_3SiO_{0.5}$  units and  $R^1SiO_{1.5}$  units, silicone resins formed from  $R^1_3SiO_{0.5}$  units,  $R^1_2SiO$  units and  $R^1SiO_{1.5}$  units, and silicone resins formed from  $R^1_3SiO_{0.5}$  units,  $R^1_2SiO$  units,  $R^1SiO_{1.5}$  units and  $SiO_2$  units.

28. (Currently Amended) The cosmetic material according to claim 24 any of Claims 24-27, wherein said ingredient I) is a silicone resin containing one or more organic groups selected from among pyrrolidone, long-chain alkyl, polyoxyalkylene, fluoroalkyl and amino in the molecule.

29. (Currently Amended) A skin care cosmetic material containing the cosmetic material according to claim 13 any of Claims 13-28.

30. (Currently Amended) A makeup cosmetic material containing the cosmetic material according to claim 13 any of Claims 13-28.

31. (Currently Amended) A hair treatment cosmetic material containing the cosmetic material according to claim 13 any of Claims 13-28.

32. (Currently Amended) An antiperspirant cosmetic material containing the cosmetic material according to claim 13 any of Claims 13-28.

33. (Currently Amended) An ultraviolet protection cosmetic material containing the cosmetic material according to claim 13 any of Claims 13-28.

34. (Currently Amended) A cosmetic material containing the cosmetic material according to claim 13 any of Claims 13-33, said material being in the form of a liquid, emulsion, cream, solid, paste, gel, powder, press, laminate, mousse, spray or stick.
